AB - JP2000322244 NOVELTY - The software of digital copier is updated from an external PC data via a general purpose interface. The PC and copier are connected by Centronics cable (1-14). When the power supply is switched ON, a flag is set and software program in flash ROM of PC is downloaded to copier.

- DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for software update procedure.

- USE - For updating entire software of digital copier, printer, scanner, facsimile.

- ADVANTAGE - Since the entire software can be downloaded from PC to copier, work hours for installing software is reduced and movement of copier is also prevented.

- DESCRIPTION OF DRAWING(S) - The figure shows the software update system.

- Centronics cable 1-14
